The KP3000 series is a $96 x 96 \mathrm{~mm}$ digital program setter with the analog output accuracy of $\pm 0.1 \%$ and maximum 30 program patterns (maximum 19 steps/ pattern).
Output signal can be specified from analog output type and digital output type. By combination with a digital indication controller with digital input, the configuration of low cost program control system is enabled.

## FEATURES

## Program pattern

Settings of maximum 19 steps per pattern and maximum 30 sets of patterns are enabled. Repeating of a whole program pattern, linking of program patterns and repeating of a specific step in a program pattern are enabled, too.

## Analog output type and digital output type

Output of setting unit is selected from high accuracy ( $0.1 \% \mathrm{FS}$ ) analog output type and digital output type which has no setting error by using communications function.

## Communications 2-port type provided

Models with 2 communications ports are available. In addition, speeding up and highly-functionalization of communications have been realized. For example, you can use 1 port for high order communications with a personal computer and another port for the communications remote (digital remote) function. The communications protocol can be arbitrarily selected from [MODBUS] and [PRIVATE].
In the digital output type, however, 1-port type of communications is only available.

## DI/DO arbitrarily-allocation

When the digital input (DI) or the digital output (DO) is added, arbitrarily-allocation for assigning functions to those DI/DO's is enabled. It is the function enabling allocations such as [External drive input] to DI1 to DI3 and [Pattern selecting input] to DI4 to DI6.

Conforming to international safety standards and European directives (CE)
The controller is conformity with European directives (CE), and is UL and c-UL approved.

## Conforming to RoHS

The controller is an environmental consideration product which does not contain directed hazardous substances such as lead, etc.

MODELS

SCREENS

## Upper display

1. Operation status (RUN) indication Lights in operation.
2. Operation stop (STOP) indication Lights in the state of operation stop.
3. RESET indication

Lights when operation is cancelled and returns to the start point.
4. Pattern No. (PTN) indication
5. Program remote (REM) indication Lights when operation is executed by digital input.
6. Executing step number (STP) indication The step No. being executed is indicated.
7. Function (FNC) operation indication Lights when the function key is operated.
15. Set value (SV) indication
16. Time signal (TS1 to TS8) indication

## Function keys

8. FNC key

With the operation screen displayed, pressing it puts the controller in the operation key mode. With the settings screen displayed, pressing it puts the controller in the setting key mode and it operates to move the cursor backwards.
9. RUN key

In the operation key mode, it operates as Run key. With the settings screen displayed, pressing it puts the controller in the setting key mode and it is used for switching between the operation screen and the mode screen of Mode 0 , or for switching from the settings screen to the mode screen.
10. STOP key

In the operation key mode, it operates as Stop key. With the settings screen displayed, pressing it puts the controller in the setting key mode and it is used to switch the settings screen.
11. ADV key

In the operation key mode, it operates as Advance key. With the settings screen displayed, pressing it puts the controller in the setting key mode and it is used for moving the cursor and for selecting a parameter.
12. RESET key

In the operation key mode, it operates as Reset key. With the settings screen displayed, pressing it puts the controller in the setting key mode and it is used for changing a setting value (or selecting a parameter) in descending order.
13. PTN key

In the operation key mode, it operates as Pattern key. With the settings screen displayed, pressing it puts the controller in the setting key mode and it is used for changing a setting value (or selecting a parameter) in ascending order.
14. ENT key

It is used for registering the settings.
18. Engineering port

## Lower display

17. A wide variety of operation screens are prepared and arbitrarily-selection is enabled.

On the whole program pattern display screen, the simultaneous display of the shape of whole program pattern and the progressed pattern position has been realized.

Time screen
Pattern screen

## OUTPUT SPECIFICATIONS

Output signal: Analog output 4 to $20 \mathrm{~mA}, 0$ to $1 \mathrm{~V}, 0$ to 10 V
Digital output RS422A, RS485
Accuracy rating: $\pm 0.1 \%$ of full scale
Output updating cycle:
Analog output Approximately 0.1 seconds
Digital output Approximately 1 second
Resolution: Approximately 1/30000
Output impedance:Voltage output Approximately $10 \Omega$
Load resistance: Current output $400 \Omega$ or less
Voltage output $50 \mathrm{k} \Omega$ or more
DISPLAY SPECIFICATIONS
Upper display: LED
Lower display: LCD (with back light) $108 \times 24$ dots

## GENERAL SPECIFICATIONS

No. of program patterns:
30 patterns
Pattern repetition ... Max. 9999 times
No. of program step:
19 step/pattern
Step repetition ... Max. 99 times
Rated power voltage:
General power supply specifications 100 to 240VAC
24 V Power supply specifications 24VAC/24VDC
Rated power supply frequency:
General power supply specifications $50 / 60 \mathrm{~Hz}$
24 V Power supply specification $50 / 60 \mathrm{~Hz}$ (24VAC)
Maximum power consumption:
General power supply specifications
Without options 100VAC 10VA
240VAC 15VA
With options 100VAC 15VA
240VAC 20VA
24 V Power supply specifications
Without options 24VAC 10VA
24VDC 5W
With options 24VAC 15VA
24VDC 10W
Power failure countermeasures
Settings stored in EEPROM (Rewrite count: One million times or less) and stored by a lithium battery for 5 years or more
Terminal screws: M3.5
Insulation resistance:
Between primary terminals and secondary terminals
$20 \mathrm{M} \Omega$ or more (500VDC)
Between primary terminals and protective conductor terminal
$20 \mathrm{M} \Omega$ or more (500VDC)
Between secondary terminals and protective conductor terminal
$20 \mathrm{M} \Omega$ or more (500VDC)
Withstand voltage: Between primary terminals and secondary terminals 1500VAC (For 1 minute)
Between primary terminals and protective conductor terminal

1500VAC (For 1 minute)
Between secondary terminals and protective conductor terminal 500VAC (For 1 minute)
*Primary terminal: Terminals for power supply (100 to 240VAC)
Casing: Fire-retardant polycarbonate
Color: Gray or black
Mounting: Panel mounting
External dimensions:
96 (H) x 96 (W) x 127 (D) mm
*The depth from the front panel is 120 mm .
Weight: $\quad$ Without options Approximately 450 g
With options Approximately 580 g

## SAFTY STANDARD

CE directives: EN61326: $1997+\mathrm{A} 1+\mathrm{A} 2+\mathrm{A} 3$
EN61010-1: 2001 (Overvoltage category II, pollution degree 2)

* Under the test conditions of EMC directives, there may be variation of indication value or output value which is equivalent to maximum $\pm 10 \%$ or maximum 2 mV , whichever is greater.
UL UL61010-1 2nd edition CAN/CSA C22.2 No.61010-1-04

## REFERENCE OPERATION CONDITIONS

Ambient temperature:
$23^{\circ} \mathrm{C} \pm 2^{\circ} \mathrm{C}$
Ambient humidity: $55 \% \mathrm{RH} \pm 5 \%$ (No condensation)
Power voltage: General power supply specifications $100 \mathrm{VAC} \pm 1 \%$
24 V power supply specifications $24 \mathrm{VDC} \pm 1 \%$
Power supply frequency:
General power supply specifications $50 / 60 \mathrm{~Hz} \pm 0.5 \%$
24 V power supply specifications DC
Mounting angle: Forward or backward $\pm 3^{\circ}$, lateral $\pm 3^{\circ}$
Installation height: Altitude 2000m or below
Vibration: $0 \mathrm{~m} / \mathrm{s}^{2}$
Impact: $0 \mathrm{~m} / \mathrm{s}^{2}$
Mounting condition:
Single-unit panel mounting (Space above, below, right and left of unit is needed.)
Wind: None
External noise: None
Warm up time: 30 minutes or longer
NORMAL OPERATION CONDITIONS
Ambient temperature:
$-10^{\circ} \mathrm{C}$ to $50^{\circ} \mathrm{C}\left(-10^{\circ} \mathrm{C}\right.$ to $40^{\circ} \mathrm{C}$ for closed installation)
Ambient humidity: 10 to $90 \%$ RH (no condensation)
Power voltage: General power supply specifications 90 to 264 VAC
24V Power supply specifications 21.6 to $26.4 \mathrm{VDC} / \mathrm{AC}$
Power supply frequency:
General power supply specifications $50 / 60 \mathrm{~Hz} \pm 2 \%$
24 V Power supply specifications DC, $50 / 60 \mathrm{~Hz} \pm 2 \%$
Mounting angle: Forward or backward $\pm 10^{\circ}$, lateral $\pm 10^{\circ}$
Installation height: Altitude 2000m or below
Vibration: $2 \mathrm{~m} / \mathrm{s}^{2}$
Shock: $\quad 0 \mathrm{~m} / \mathrm{s}^{2}$
Mounting condition:
Single-unit panel mounting (Space above and below of the unit is needed.)
External noise: None
Rate of ambient temperature change:
$10^{\circ} \mathrm{C} /$ hour or less

## TRANSPORT CONDITIONS

Ambient temperature:
$-20^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}$
Ambient humidity: 5 to $90 \% \mathrm{RH}$ (no condensation)
Vibration: $\quad 4.9 \mathrm{~m} / \mathrm{s}^{2}(10$ to 60 Hz )
Impact: $\quad 392 \mathrm{~m} / \mathrm{s}^{2}$
Under the condition that the unit is packed for shipment by the factory

## STORAGE CONDITIONS

Ambient temperature:
$-20^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}$
For long term storage, the temperature should be $10^{\circ} \mathrm{C}$ to $30^{\circ} \mathrm{C}$.
Ambient humidity: 5 to $90 \%$ RH (no condensation)
Vibration: $0 \mathrm{~m} / \mathrm{s}^{2}$
Impact: $0 \mathrm{~m} / \mathrm{s}^{2}$
Under the condition that the unit is packed for shipment by the factory

## KP3000 SERIES

## OPTIONS

Communications interface
With RS232C, RS422A or RS485, the setting and measured values of the controller can be transmitted to a master CPU and various parameters can be set by the master CPU.
Number of communications points: 2 points
Communications type: RS232C, RS422A, RS485
Communication speed: 2400/4800/9600/19200/38400 bps
Protocol: MODBUS (RTU), MODBUS (ASCII), PRIVATE
Digital signal input
The following switching is enabled by digital input signal.
Input signal: No-voltage contact, open-collector signal
External contact capacity:
5VDC 2mA
Functions: $\quad$ 1. Selection of pattern No. (6 points)
2. Run/stop
3. Advance
4. Reset
5. Wait
6. Fast

Digital signal output
Time signal or status signal can be outputted externally open-collector signal.

| Output signal: | Open-collector signal |
| :--- | :--- |
| Capacity: | 24VDC, Maximum 50mA |
| Functions: | 1. Time signal (Maximum 8 points) |
|  | 2. Run/stop |
|  | 3. Advance |
|  | 4. Reset |
|  | 5. Wait |
|  | 6. End |

## Panel sealing

By mounting the controller to a panel, it has the panel sealing equivalent to [IP54 compliance].

Terminal cover
It covers the terminals for safe. The cover is transparent.
