

# *TEMPERATURE CALIBRATION EQUIPMENT*

# For to maintain temperature accuracy

**We provide abundant thermometer calibration equipment such as thermocouple, resistance thermometer, infrared thermometer and glass thermometer to assist traceable measurement at customers' site.**

Traceability is required for thermometers used in various industries such as research, production, inspection and distribution because of quality control, ISO, HACCP, safety and maintaining accuracy.

CHINO prepares calibration equipments, measurement instruments and standard sensors for thermocouples, resistance thermometers, infrared thermometers, glass thermometers for to assist to establish customers' traceability systems. These are used in widely used in each industry and testing/research institute.

**CHINO is "MRA approved member" and issues a calibration certificate with the JCSS (Japan Calibration Service System) approved symbol mark and we are supporting the traceability to the national standards.**

We issue calibration certificate with the JCSS approved symbol mark.

Also, we conduct wide variety of calibration for all temperature related instruments such as temperature sensors, infrared thermometer, glass thermometers and calibration testing for measurement control instruments.

※The calibration certificate with the JCSS approved symbol mark was issued by the calibration laboratory accredited by IAJapan who is signatory to the Mutual Recognition Arrangement (MRA) of International Laboratory Accreditation Cooperation (ILAC) and Asia Pacific Laboratory Accreditation Cooperation (APLAC). This calibration result is accepted internationally through ILAC/APLAC MRA.

# Trusted Network

We provide calibration at each part of the world for to support every one of you.
