DB1000 SERIES DIGITAL INDICATING CONTROLLER

The DB1000 series is a 96×96 mm digital indicating controller with the indicating accuracy of $\pm 0.1\%$ and the control cycle of approximately 0.1 seconds. Various functions including universal input and multiple setting values (8 types) are provided as standard.

■ FEATURES

●Large easy-to-view 5-digit display

Process value (PV) and set value (SV) are displayed by large easy-to-view 5-digit display indicators. The resolution of 0.1°C is enabled for more than 1000°C.

•Highly-functional operation screen and settings screen

The controller inherits the operation screen and the settings screen adopting the LCD (liquidcrystal-display) which has been familiarized for long time. Furthermore, the screens have become high-definition and highly sophisticated.

Outstanding controllability

Two types of PID algorithms, the position-type PID algorithm and the speed-type PID algorithm, have been installed. You can select the optimum PID algorithm for an object controlled.

Operability inheriting previous models

The controller inherits the settings screen which has been familiarized for long time. You can set up it with operation which is not different from previous models. The performance of touching-keys has been improved and the outstanding operability has been realized.

High-precision remote signal input and transmission signal output

The high-precision (0.1% of full scale) analog remote signal input and the analog transmission signal output can be added.

●24V power supply voltage type available

The power supply voltage 24V (AC/DC) type, which is advantageous in respect of safe, is available.

Motor feedback value indication enabled in ON-OFF servo output type

[Operation screen of the ON-OFF servo output type]

Simultaneous indications of ON/OFF status of output, control output value (MV) and motor feedback value have been realized.

Universal input

Various measurement ranges of DC voltage (up to maximum 10V) inputs, DC current input, thermocouple inputs and resistance thermometer inputs have been built-in.

2 colors of casing available

You can select the color of casing from 2 colors of gray with OA equipment feeling and black with high-class feeling.

Conforming to international safety standards and European directives (CE)

The controller is in conformity with European directives (CE), and is UL and c-UL approved.

Conforming to RoHS

The controller is an environmental consideration product which does not contain directed hazardous substances such as lead, etc.

NAMES OF VARIOUS PARTS

- 1. Operation status (RUN) indication Lights in operation.
- Slope (SLOPE) indication Lights in slope operation of SV.
- Alarm-standby (WAIT) indication Lights in alarm-standby status or when alarm is cancelled.
- 4. Remote (REM) indication
- 5. Executing set value number (NO.) indication
- Error (ERR) indication Lights when sampling of input is abnormal.
- 7. Auto-tuning operation (AT) indication Lights in auto-tuning operation.
- Manual operation (MAN1/MAN2) indication Lights when the output No.1 or No. 2 is in manual output operation.
- 15. Process value (PV) indication
- 16. Set value (SV) indication
- 17. Alarm activation (AL1 to 4) indication
- 18. LCD display

- 9. It is used for switching between the operation screen and the mode screen of Mode 0, or for switching from the settings screen to the mode screen.
- 10. It is used to switch the operation screen or to switch the settings screen.
- 11. It is used for switching between the automatic output operation and the manual output operation.
- 12. It is used for moving the cursor and for selecting a parameter.
- 13. It is used for changing a setting value (or selecting a parameter) in descending or ascending order.
- 14. It is used for registering the settings.

19. Engineering port

■ SAFTY STANDARD		■ STORAGE CONDITIONS	
CE : UL: c-UL:	EN61326: 1997 +A1+A2+A3 EN61010-1: 2001 (Overvoltage category II, pollution degree 2) * Under the test conditions of EMC directives, there may be variation of indication value or output value which is equivalent to maximum ±10% or maximum 2mV, whichever is greater. UL61010-1 2nd edition CAN/CSA C22.2 No.61010-1-04	Ambient temperature: Ambient humidity: Vibration: Shock:	-20°C to 60°C For long term storage, the temperature should be 10°C to 30°C. 5 to 90%RH (no dew condensation) 0m/s ² 0m/s ² Under the condition that the unit is packed for shipment by the factory

■ OPTIONS

Transmission signal output

Output a signal corresponding to set value (SV), process value (PV), manipulated value (MV), etc.

Number of output: 1 point Output signal: 4 - 20mA (Load resistance 400Ω or less) 0 - 1V (Output resistance Approx.10Ω, Load resistance 50kΩ or more) 0 - 10V (Output resistance Approx.10Ω, Load resistance 50kΩ or more)

±0.1% of full scale

Remote signal input

Output accuracy:

By using external contacts, switching of remote mode and local mode is enabled. With the remote mode, the setting of SV is enabled by remote signal.

Number of inputs:	1 point		
Input signal:	4 - 20mA	(Input impedance	Approx.50Ω)
	0 - 1V	(Input impedance	Approx. 500kΩ)
	0 -10V	(Input impedance	Approx.100kΩ)
Input accuracy:	±0.1% ± 1digit		
Remote signal input:	R/L (Rem	ote/Local)	

Communications interface

With RS232C, RS422A or RS485, the setting and measured values of the controller can be transmitted to a master CPU and various parameters can be set by the master CPU. Number of communications points:

1 point Communications type: RS232C, RS422A, RS485 Communications speed: 2400/4800/9600/19200/38400 bps Protocol: MODBUS (RTU), MODBUS (ASCII), PRIVATE

•2-output type

2 kinds of output w	ith direct and reverse actions are outputted and		
simultaneous control of heating/cooling is enabled.			
Control cycle: Approx. 0.1 seconds			
Output type: ON-OFF pulse type, Current output type, Voltage output type, SSR drive pulse type			
	Any combinations of these types are enabled.		
Control system:	PID system		

External set value switching

The selection of executing No. (SV) is enabled. 4 points Number of inputs: Input signal: No-voltage contact, open-collector signal External contact capacity: 5VDC 2mA

Panel sealing

By mounting the controller to a panel, it has the panel sealing equivalent to [IP54 compliance].

Terminal cover

It covers the terminals for safe. The cover is transparent.

DETAILED SPECIFICATIONS OF ACCURACY RATINGS

Inp	out type	Accuracy rating	Exceptional specifications
Thermocouple –	В		Less than 400°C: Not specified / 400°C to less than 800°C: ±0.2% ±1 digit
	R、S		0°C to less than 400°C: ±0.2% ±1 digit
	Ν	±0.1%±1digit	
	К		-200°C to less than 0°C: $\pm 0.2\% \pm 1$ digit or the value equivalent to $\pm 60 \mu$ V, whichever is greater
	E		-270°C to less than 0°C: $\pm 0.2\% \pm 1$ digit or the value equivalent to $\pm 80 \mu$ V, whichever is greater
	J		-200°C to less than 0°C: $\pm 0.2\% \pm 1$ digit or the value equivalent to $\pm 80 \mu$ V, whichever is greater
	Т		-270°C to less than 0°C: $\pm 0.2\% \pm 1$ digit or the value equivalent to $\pm 40 \mu$ V, whichever is greater
	U		-200°C to less than 0°C: $\pm 0.2\% \pm 1$ digit or the value equivalent to $\pm 40 \mu$ V, whichever is greater
	L		-200°C to less than 0°C: ±0.2% ±1digit
	WRe5-WRe26		
	W-WRe26		0°C to less than 400°C ±0.3% ±1 digit
	NiMo-Ni		
	Platinel II		
	CR-AuFe		0K to less than 200K: \pm 0.5% \pm 1 digit / 20K to less than 50K: \pm 0.3% \pm 1 digit
	PR5-20	±0.2%±1digit	0°C to less than 100°C: Not specified / 100°C to less than 200°C: ±0.5% ±1 digit
	PtRh40-PtRh20		0°C to less than 400°C: ±1.5% ±1 digit / 400°C to less than 800°C: ±0.8% ±1 digit
DC voltage / DC current		±0.1%±1digit	
	Pt100		
Resistance thermometer	Old Pt100	±0.1%±1digit	For the measuring range of [-100°C to 100°C] only: $\pm 0.15\% \pm 1$ digit
	JPt100		
	JPt50		
	Pt-Co	±0.15%±1digit	4K to less than 20K : $\pm 0.5\% \pm 1$ digit / 20K to less than 50K : $\pm 0.3\% \pm 1$ digit

The above ratings are the measurement range conversion accuracies under the reference operating conditions.

The above ratings are the measurement range conversion accuracies under the reference opera For thermocouple inputs, the reference junction compensation accuracy is added.
