Consolidated Financial Results for the Six Months Ended September 30, 2026 (Under Japanese GAAP)

Name of the Listed Company: CHINO CORPORATION Listed Stock Exchanges: Tokyo Stock Exchange
Securities Code: 6850 URL: https://www.chino.co.jp/
Representative: Mikio Toyoda, President and CEO
Contact: Kazumasa Ohmori, Executive Officer, Executive Manager, Business Management Headquarters
TEL: +81-3-3956-2115
Scheduled date to file quarterly securities report: November 12, 2026
Scheduled date to commence dividend payments: December 11, 2026
Preparation of supplementary material on quarterly financial results: Yes
Holding of quarterly financial results briefing: Yes (for institutional investors and analysts)

(Millions of yen with fractional amounts rounded down)

1. Consolidated financial results for the six months ended September 30, 2026 (from April 1, 2026 to September 30, 2026)

(1) Consolidated operating results (Percentages indicate year on year changes.)

	Net sales		Operating profit		Ordinary profit		Profit attributable to owners of parent	
Six months ended	Millions of yen	%	Millions of yen	%	Millions of yen	%	Millions of yen	%
September 30, 2026	15,008	5.8	1,639	78.7	1,664	73.4	920	96.6
September 30, 2025	14,187	7.8	917	△14.0	960	△16.0	468	△26.1

Note: Comprehensive income For the six Months Ended September 30, 2026: 1,523 million yen(130.4%)
For the six Months Ended September 30, 2025: 660 million yen(△27.5%)

	Basic earnings per share	Diluted earnings per share
Six months ended	Yen	Yen
September 30, 2026	55.76	―
September 30, 2025	27.53	―

(2) Consolidated financial position

	Total assets	Net assets	Equity ratio	Net assets per share
As of	Millions of yen	Millions of yen	%	Yen
September 30, 2026	39,792	26,805	59.3	1,444.60
March 31, 2026	41,109	26,585	56.9	1,397.94

Reference: Equity As of September 30, 2026: 23,583 million yen
As of March 31, 2026: 23,379 million yen

2. Cash dividends

	Dividend per share				
	First quarter-end	Second quarter-end	Third quarter-end	Fiscal year-end	Annual
Fiscal year ended March 31, 2026	Yen ―	Yen 25.00	Yen ―	Yen 30.00	Yen ―
Fiscal year ending March 31, 2027	―	20.00			
Fiscal year ending March 31, 2027 (Forecast)			―	45.00	65.00

(Notes)1: Revisions to the most recently announced forecast of the dividend: None
2: The Company implemented a 2-for-1 share split effective October 1, 2025. The dividend amount for the end of the second quarter of the fiscal year ending March 2026 is shown prior to the share split. The year-end dividend for the fiscal year ending March 2026 is shown after the share split. Therefore, the annual dividend for the fiscal year ending March 2026 is shown as "–".
3: Breakdown of the year-end dividend for the fiscal year ending March 2027: Regular dividend: 35.00 yen; Commemorative dividend: 10.00 yen

3. Consolidated financial forecasts for the fiscal year ending March 31, 2027 (from April 1, 2026 to March 31, 2027)

(Percentages indicate year on year changes.)

	Net sales		Operating profit		Ordinary profit		Profit attributable to owners of parent		Basic earnings per share
	Millions of yen	%	Millions of yen	%	Millions of yen	%	Millions of yen	%	Yen
Fiscal year ending March 31, 2027	33,500	5.9	3,800	17.8	3,900	17.2	2,300	12.6	140.51

(Notes)1: Revisions to the most recently announced earnings forecasts: Yes

2: The "Basic earnings per share" in the consolidated earnings forecast for the fiscal year ending March 2027 has been calculated taking into account the impact of the resolution on the repurchase of Treasury shares passed at the Board of Directors meeting held on November 12, 2025.

* Notes

(1) Changes in significant subsidiaries during the period (changes in specified subsidiaries resulting in the change in scope of consolidation): None

Newly included: None

Excluded: None

(2) Application of special accounting methods for preparing quarterly consolidated financial statements : Yes

(Note) For details, please refer to"(Notes of special accounting methods for preparing quarterly consolidated financial statements) of (4)Notes to consolidated financial statements of 2.Consolidated Financial Statements and Significant Notes Thereto" on page 12 of the attached document.

(3) Changes in accounting policies, changes in accounting estimates and retrospective restatement

(i) Changes in accounting policies due to revisions to accounting standards and other regulations: None

(ii) Changes in accounting policies other than (i): None

(iii) Changes in accounting estimates: None

(iv) Restatement: None

(4) Number of shares issued (common shares)

(i) Total number of shares issued at the end of the period (including treasury shares)

As of September 30, 2026 18,520,232 shares As of March 31, 2026 18,520,232 shares

(ii) Number of treasury shares at the end of the period

As of September 30, 2026 2,194,959 shares As of March 31, 2026 1,795,938 shares

(iii) Average number of shares during the period (mid-term)

As of September 30, 2026 16,516,237 shares As of September 30, 2025 17,014,819 shares

*Quarterly financial results reports are exempt from quarterly review conducted by certified public accountants or an audit corporation.

* Proper use of earnings forecasts, and other special matters

(Note regarding forward-looking statements)

The forward-looking statements such as the forecasts of financial results stated in this document are based on the information currently available to the Company and certain assumptions that the Company judges as rational. These statements are not guarantees of future performance. Actual results may differ substantially from the forecasts due to various factors. Please refer to "(4) Details of outlook including consolidated financial forecasts in the future" under "1. Details of operating results" on page 6 f the attached materials for the assumptions used in the forecasts and notes regarding the use of the forecasts.

(How to access supplementary materials on financial results)

The Company plans to post the supplementary materials on financial results on the company website shortly.

1. Details of operating results

(1) Details of operating results

During the current interim consolidated accounting period, the economic environment has continued to be marked by uncertainty, as rising energy prices and disruptions to supply chains stemming from escalating tensions in the Middle East have fueled ongoing global inflationary pressures, while concerns about a slowdown in economic growth due to monetary tightening in major economies have also persisted.

Amid these circumstances, fiscal year 2026, the final year of our Mid-Term Management Plan (FY2021–FY2026), marks the culmination of our efforts. To bring this plan to a successful conclusion, we are leveraging our core strengths in measurement, control, and monitoring technologies to ensure the quality and safety our customers demand, while also advancing initiatives that contribute to improved productivity, automation, energy conservation, and data utilization, thereby transforming our past efforts into tangible results.

During the current interim consolidated accounting period, the business environment surrounding our Group was characterized by generally robust demand for capital expenditures among our major customers in the manufacturing sector. In particular, demand for capital expenditures was strong in the semiconductor and electronic components sectors, and demand remained firm across a wide range of sectors, including hydrogen energy, related to decarbonization efforts, and the shipbuilding sector.

Regarding net sales, revenue increased in the Measurement & Control Instruments Segment and the Sensors Segment. In the Instrumentation Systems Segment, revenue declined in the first quarter (April–June) due to a pullback from the recognition of several large-scale projects in the same period of the previous fiscal year; however, revenue remained largely flat year-over-year as large-scale projects were recognized in the second quarter (July–September). By region, domestic Net sales exceeded the same period of the previous year as demand remained strong, particularly in the semiconductor and electronic components sectors. Meanwhile, in the Asia region, Net sales declined due to a reaction to the recognition of large-scale projects for Thailand and India in the same period of the previous year; however, demand in China and South Korea, which account for a high proportion of sales in the region, continued to remain strong.

Please note that orders received and Net sales in the Instrumentation Systems segment are subject to the timing of customer orders and delivery schedules within the fiscal year, and as a result, year-over-year comparisons on a quarterly basis tend to fluctuate.

In terms of profits, all segments posted year-over-year increases in segment profit. In the Measurement & Control Instruments Segment and the Sensors Segment, the positive impact on earnings from the product price revisions implemented in April of this year, which took into account rising costs such as raw materials and labor expenses, in addition to ongoing cost-reduction efforts, is beginning to show in the financial results. Furthermore, in the Instrumentation Systems Segment, the segment profit for the current period exceeded that of the same period last year, partly due to the impact of having recorded a large-scale project with a low profit margin in the prior-year period.

As a result, orders received during the current interim consolidated accounting period totaled 16,046 million yen (up 11.6% year-on-year), and net sales totaled 15,008 million yen (up 5.8% year-on-year). Regarding profits, operating profit was 1,639 million yen (up 78.7% year-on-year), ordinary profit was 1,664 million yen (up 73.4% year-on-year), and profit attributable to owners of parent was 920 million yen (up 96.6% year-on-year).

Results by segment are as follows.

1) Measurement & Control Instruments

Net sales totaled 4,915 million yen (up 6.4% year-on-year), and Segment profit was 737 million yen (up 5.5% year-on-year). Demand remained strong, particularly for manufacturing equipment for semiconductors and electronic components. Although demand for OEM products for specific customers continued to stagnate, net sales increased compared to the same period last year.

In terms of profits, earnings increased year-over-year due to higher revenue and the effects of price adjustments.

2) Instrumentation Systems

Net sales totaled 4,531 million yen (down 0.0% year-on-year), and Segment profit was 700 million yen (up 228.3% year-on-year). Although revenue was impacted by the absence of a large-scale order for compressor performance testing systems recorded in the same period of the previous fiscal year, revenue remained largely flat year-over-year due to the recognition of sales from water electrolysis testing systems for research and development in hydrogen energy applications, as well as demand for capital investment in the semiconductor and electronic components sectors.

In terms of profitability, while a decline in the profit margin on a major project involving compressor performance testing systems during the same period last year impacted the Segment profit, the profit margin recovered to its normal level during the current interim period, resulting in a significant year-over-year increase in Segment profit.

3) Sensors

Net sales totaled 5,019 million yen (up 11.5% year-on-year), and Segment profit totaled 1,206 million yen (up 28.6% year-on-year). Net sales increased year-on-year due to strong performance in equipment for the manufacture of semiconductors and electronic components, as well as continued growth in sales of Temperature Sensors and other products manufactured and sold by MEIYO ELECTRIC Co.,Ltd., a Group company.

In terms of profits, earnings increased year-over-year, primarily due to higher revenue..

4) Others

Net sales totaled 542 million yen (up 1.9% year-over-year), and segment profit was 217 million yen (up 59.8% year-over-year).

(2) Details of financial position

(Assets)

Total assets at the end of the current interim consolidated fiscal period decreased by 1,316 million yen compared to the end of the previous consolidated fiscal year, totaling 39,792 million yen.

Current assets decreased by 2,033 million yen compared to the end of the previous consolidated fiscal year, totaling 27,545 million yen. The main factors contributing to this change were a decrease of 2,055 million yen in trade receivables, a decrease of 666 million yen in cash and deposits, and an increase of 606 million yen in inventories.

Non-current assets increased by 716 million yen compared to the end of the previous consolidated fiscal year, totaling 12,246 million yen. The main factors contributing to this increase were a 442 million yen increase in Investments and other assets and a 229 million yen increase in Property, plant and equipment.

(Liabilities)

Total liabilities at the end of the current interim consolidated fiscal period decreased by 1,537 million yen compared to the end of the previous consolidated fiscal year, totaling 12,986 million yen.

Current liabilities decreased by 1,243 million yen compared to the end of the previous consolidated fiscal year, totaling 8,479 million yen. The main factors contributing to this decrease were a 683 million yen decrease in trade payables and a 501 million yen decrease in Other（Current liabilities）.

Non-current liabilities decreased by 294 million yen compared to the end of the previous consolidated fiscal year, totaling 4,507 million yen. The primary factor behind this decrease was a 266 million yen reduction in long-term borrowings.

(Net assets)

Total net assets at the end of the current interim consolidated accounting period increased by 220 million yen compared to the end of the previous consolidated fiscal year, reaching 26,805 million yen. The main factors contributing to this change were a 920 million yen increase in Profit attributable to owners of the parent, a 435 million yen increase in accumulated other comprehensive income (valuation difference on available-for-sale securities), a 677 million yen decrease due to the purchase of Treasury shares, and a 501 million yen decrease due to dividends paid.

(3) Details of cash flows

1) Cash flows from operating activities

Cash flows from operating activities during the current interim consolidated period resulted in a net increase in cash of 1,621 million yen (compared with a net increase of 1,621 million yen in the same period of the previous fiscal year). This was mainly due to cash inflows from profit before income taxes of 1,708 million yen and a decrease in trade receivables of 2,079 million yen, which exceeded cash outflows from a decrease in trade payables of 698 million yen, an increase in inventories of 583 million yen, and income taxes paid of 574 million yen.

2) Cash flows from investing activities

Cash outflows from the purchase of property, plant and equipment (693 million yen) and from payments into time deposits (418 million yen), among other items, exceeded cash inflows from proceeds from withdrawal of time deposits (329 million yen) and other items. As a result, cash flows from investing activities for the current interim consolidated period resulted in a net cash outflow of 811 million yen (compared to a net cash outflow of 830 million yen in the same period of the previous year).

3) Cash flows from financing activities

Due to the purchase of treasury shares (677 million yen), dividends paid (501 million yen), and repayments of long-term borrowings (266 million yen), among other factors, cash flows from financing activities for the current interim consolidated accounting period resulted in a net cash outflow of 1,596 million yen (compared to a net cash outflow of 880 million yen in the same period of the previous year).

As a result, the balance of Cash and cash equivalents at the end of the current interim consolidated accounting period decreased by 746 million yen from 9,281 million yen at the end of the previous consolidated fiscal year, to 8,534 million yen.

(4) Details of outlook including consolidated financial forecasts in the future

For the first half of the fiscal year ending March 2027, net sales were supported by generally robust capital expenditure demand among our major customers in the manufacturing sector. In particular, capital expenditure demand was strong in the semiconductor and electronic components sectors, and demand remained firm across a wide range of sectors, including hydrogen energy—related to decarbonization efforts—and the marine sector. Furthermore, regarding profits, both net sales and profit margins exceeded the previously announced forecasts as a result of efforts to improve profit margins in addition to the increase in net sales.

With regard to our consolidated earnings forecast for the fiscal year ending March 2027, we are revising the forecast we announced on May 14, 2026, based on our performance progress during the first half of the fiscal year and the expectation that robust demand for capital expenditures from our major customers will continue into the second half.

For further details, please refer to the “Notice Regarding Q2 Earnings Forecast Variance and Revisions to Full-Year Earnings and Dividend Forecasts” released today (November 11, 2026).

Cash and cash equivalents at end of period	7,414	8,534

(4) Notes to consolidated financial statements

(Notes of special accounting methods for preparing quarterly consolidated financial statements)

With respect to the calculation of tax expenses, reasonable estimations are performed on an effective tax rate established after applying tax accounting to profit before income taxes for the consolidated fiscal year, which includes the first six months of the consolidated fiscal year under review, and such tax expenses are calculated by multiplying this estimated effective tax rate by profit before income taxes.

In cases where calculating tax expenses using the estimated effective tax rate would be significantly irrational, the statutory effective tax rate is used.

The statutory effective tax rate is used.

(Notes on segment information)
